

LIH Members Station Distances

IMPORTANT NOTE: In SpeedFancier, each race is set up by choosing the race station from a drop down menu in the SWOA race station data base. Doing this sets the coordinates for the release point for all clubs. This ensures that SpeedFancier is calculating results using the same co ordinates for both club and combined results. **These co ordinates may differ from the co ordinates listed in the club portal but that doesn't impact the outcome of the race results.** The coordinates below may not be exact but can be used to estimate distances but all races are calculated using the same coordinates from the SWOA race station data. (Data taken from SpeedFancier, LIH Race Stations May 2023)

Station Distances for Mario Barreto (42.97963900, -81.21111100)

Station Name	Distance	Category	Lat	Lng
